

INTRO

Hey there - Thomas from Marathon Handbook here. Thanks for taking the time to grab a copy of this plan!

CUSTOMIZING THE PLAN

No two runners are the same, and there's no such thing as a one-size-fits-all plan. That's why I make all my plans easy to customize: use the Google Sheets or Excel version of this plan to move things around to suit your weekly schedule, shorten or extend the plan, and mix up the workouts to suit your ability level.

MEDICAL DISCLAIMER

This plan is for informational purposes only: it is not a certified exercise / health / wellness regime. Partake in run training at your own risk, always consult a doctor before starting a new exercise regime, and don't do anything stupid. Now let's get on with the details...

BREAKDOWN OF TRAINING WORKOUTS

Here's a brief rundown of the types of workout in the plan, and how to do them:

Easy Runs

Run at a conversational pace to aid recovery from harder workouts.

Distance Run

Base-building run to improve your endurance. Run at an easy pace.

Long Run

Long endurance workouts to improve physical and mental stamina. Run at an easy pace.

Tempo Run

Run at a pace you can sustain all out for one hour.

Speed Workout

Pace training to improve speed.

Shake Out

Very relaxed run to loosen up the day before a race or key workout.

Strides

With strides, accelerate over the duration of the stride, reaching max speed at the end of each one.

Cross Training

Training: Non-running aerobic workout. Examples include cycling, swimming, rowing, elliptical, aqua jogging, and hiking.

Strength Training

In addition to the training plan as written, it's also a good idea to strength train twice a week.

[Your strength training workouts should be total-body workouts, focusing on compound exercises like squats, lunges, step-ups, deadlifts, push-ups, pull-ups, rows, and core exercises. For our strength training guide for runners, click here.](#)
