

MARATHON HANDBOOK 8 WEEK BEGINNER SPRINT TRIATHLON TRAINING PLAN: GUIDANCE NOTES

INTRO

Hey there - Thomas from Marathon Handbook here. Thanks for taking the time to grab a copy of this plan! As the name suggests, this is an 8 week sprint triathlon training plan for beginners.

CUSTOMIZING THE PLAN

No two runners are the same, and there's no such thing as a one-size-fits-all plan. That's why I make all my plans easy to customize: use the Google Sheets or Excel version of this plan to move things around to suit your weekly schedule, shorten or extend the plan, and mix up the workouts to suit your ability level.

MEDICAL DISCLAIMER

This plan is for informational purposes only: it is not a certified exercise / health / wellness regime. Partake in run training at your own risk, always consult a doctor before starting a new exercise regime, and don't do anything stupid. Now let's get on with the details...

BREAKDOWN OF TRAINING WORKOUTS

Here's a brief rundown of the types of workout in the plan, and how to do them:

Rest Days

No structured exercise. Focus on rest and recovery (stretching, foam rolling, taking it easy).

Brick Workouts

A workout consisting of at least two different disciplines performed one immediately after the other. This works on transitions.

Run/Walk Intervals

Run and walk the intervals indicated in each workout.

Easy Runs

Run at a conversational pace to aid recovery from harder workouts.

Strength Training

In addition to the training plan as written, it's also a good idea to strength train twice a week.

[Your strength training workouts should be total-body workouts, focusing on compound exercises like squats, lunges, step-ups, deadlifts, push-ups, pull-ups, rows, and core exercises. For our strength training guide for runners, click here.](#)
